

Kevin:

Before hiring DFW Multimedia, I interviewed many other Multimedia Firms. I found that often I was just speaking with a salesperson who knew little of the nuts and bolts of how to design a product video that was clean, efficient and marketed our products effectively. It was a different story with DFW Multimedia.

From the beginning, I set forth the parameters that I wanted and a tight time frame. Production was a breeze, and a fun experience, you were able to deliver On Time and On Budget. During the editing process you were able to use your creative expertise in picture placement, sound and formatting text to be able to get the point across in a fun and professional manner. Please feel free to keep my name as one of your many satisfied customers. I think the end product is spectacular!

Yours sincerely, Bill McFadyen.
